GIAN LOUIE D.

SYSTEM PROFILE

STATUS: ONLINE
LOC: Philippines

Technical Background

I'm an IT student focused on performance and aesthetics. Most of my time is spent deep in Lua scripting and FiveM modding, or optimizing Windows for peak forensic efficiency. I love wrapping system-level scripts in clean, glassmorphic designs.

Outside of development, I am heavily immersed in competitive and open-world environments. Whether it's the tactical precision of **Valorant**, the vast landscapes of **Red Dead Redemption**, or the vibrant world of **Genshin Impact**, my passion for gaming drives my desire to build smoother, more optimized player experiences.

PARTNER

Nadine

In a world built on logic and cold syntax, Nadine is the only warmth. She is the **source code** of my happiness—the foundational layer that makes everything else possible.

No matter how many miles of code I write, all paths lead back to her. Our love is the only thing in my life that is truly **unbreakable by design.**

@ENCRYPTION: FOREVER ALIGNED

CONNECTION: STABLE
ROLE: Inspiration/FutureWife

CAPABILITIES

1.

Front-end Architecture 90%

HTML / CSS / JS / UI UX

2.

Fivem Development 95%

Advanced Lua / NUI Menus / Server Optimization

3.

Roblox Game Dev 85%

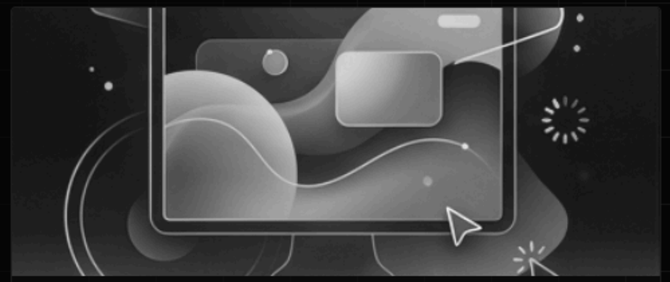
Lua Scripting / Game Mechanics / DataStores

4.

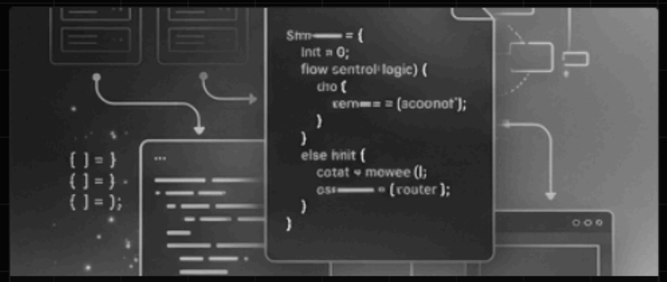
System Optimization 88%

Registry Cleaning / Performance Tuning

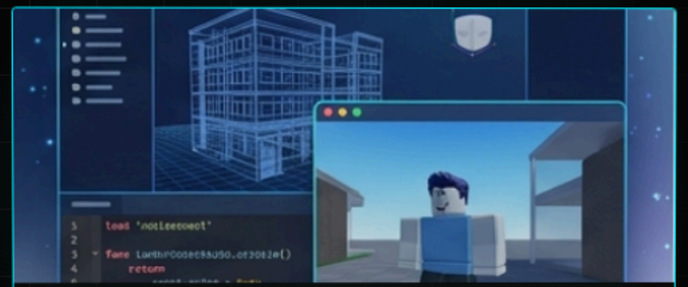
PROJECTS



1. UI CORE
Interactive landing pages with custom motion design.



2. SCRIPT LOGIC
Advanced Lua server-side logic for gaming environments.



3. ROBLOX GAME DEV
Multiplayer mechanics using Py, Lua.
